

SOFT WATER TO ENHANCE YOUR LIFE.

CITY SOFT

Improve your life with softer water. The City Soft maximizes the incredible benefits of soft water, including spot-free dishes, cleaner laundry, softer skin, better-performing water fixtures and longer-lasting appliances. The Flowise City Soft also includes special media to extend the life of the product and provide you with even better water. You won't know how you lived before the City Soft!

CITY SOFT

WATER THAT ENHANCES YOUR LIFE

Those who have upgraded will tell you, life is just better with soft water. Cleaner laundry, cleaner bathrooms and a cleaner life.

Remove Harsh Calcium and Clean Easier

Hard water—full of calcium and other rocky minerals—pummels your appliances and fixtures with every use. And, cleaning your home with hard water is a pain. It makes you use more soap to get something clean while leaving spots and streaks. It's time you upgraded to the City Soft, which protects your home and makes cleaning and polishing a breeze.

Reduce chlorine for more enjoyable water

The City Soft reduces the excess chlorine left behind after disinfection. When you remove unnecessary chlorine in your home's water supply, you eliminate the unpleasant smells, tastes and skin irritation often associated with chlorine.

Longer Lasting

The Flowise City Soft includes chlorine/chloramine reduction media that extends the life of the product and addresses the specific water chemistry of the city water.

Better for the Environment

The City Soft system uses Vortech™ technology coupled with the Vortech™ water softening smart valve, the world's most innovative and efficient universal distribution system for water treatment. The innovative Vortech™ system takes efficiency to the next level. Because the City Soft only regenerates when necessary, it achieves greater energy, water and salt efficiency than industry standard softeners—up to 40% more efficient—which means you can enjoy the benefits of soft water comfortably and be mindful of the planet at the same time.

Return on your Investment

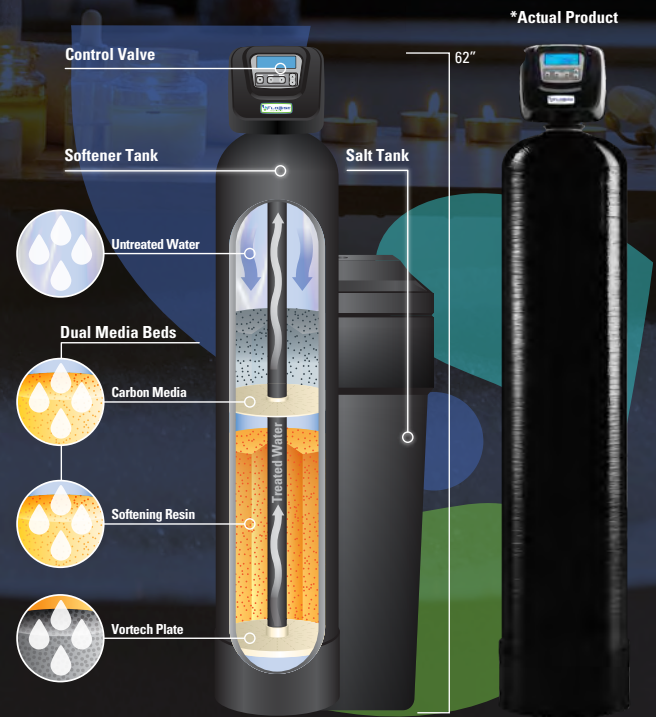

The City Soft can improve your hot water heater efficiency by up to 30%—think about the annual savings! Plus, the softer water allows you to cut down on soap and cleaning product use by as much as 50% and protect the life of your appliances that use water.

BENEFITS

- Spot-free dishes
- Easier cleaning ability
- Cleaner laundry
- Softer skin
- Money savings
- Time savings
- Less soap and cleaning products can be used
- Better-looking faucets and fixtures with no scale buildup
- Longer-lasting appliances
- Improved energy efficiency
- Chlorine/chloramine reduction media to extend the life of the product

HOW IT WORKS

1. Untreated water flows through the carbon media addressing the chlorine/chloramines in the water. Resins soften water by reducing calcium and magnesium in water.
2. Water then flows through the first Vortech plate and through the softening resin.
3. TechSoft media softens water by reducing calcium, magnesium and certain metals in the water.
4. Conditioned water flows effectively through the Vortech plate and enters your home providing better water, cleaner laundry, softer skin, easier cleaning, as well as soap, energy, and appliance savings.
5. When the softening resin is ready to be cleaned and recharged, the system uses a brine (salt or potassium) solution accompanied by the Vortech plate to efficiently lift and clean the resin while providing significant salt and water savings due to its revolutionary design.
